 <h3>Asset Management</h3> <p>Manage both tangible and intangible assets to achieve long-term value from the assets in your organisation. Our modules are used widely throughout Australasia by private and public asset owners and their maintenance providers to manage infrastructure assets, water, buildings, open spaces, and more, all on the same cloud-based map.</p>  <p>An Introduction to RAMM Map</p>	 <h3>Corridor Management</h3> <p>Submitica and Submitica Control are your seamless solution when utility operators, service providers, their agents, and others, need to work in your road reserves. Manage the entire request process from start to finish – electronically.</p>  <p>An Introduction to Submitica Control</p>	 <h3>Field Management</h3> <p>Manage your assets and maintenance work on your mobile device. Use our mobile applications to add jobs, update assets, perform asset assessments and dispatch inspections in real time using GPS positioning, without the need for paper forms.</p>  <p>Pavement Management</p>	 <h3>Work Management</h3> <p>Our work management modules provide a complete end-to-end solution for programming and managing your asset maintenance. Simplify your work management processes by capturing and processing work requests and associated costs from different sources in one place.</p>  <p>AN INTRODUCTION TO DISPATCHES</p>
